Burs, Drills, and Blades for the Air Tool

All items on this page are designed for the air tool. Burs and drills may be used in the Dremel by using a 482-D (1/16") collet.

199 (699L) Carbide Bur \$4.95

Use for fine filigree cutting.
Has longer cutting edge than 201.
Use on most eggshells.

197 Cutting Bur \$6.95

Great for cutting Emu, Rhea & Ostrich eggs.
Cuts wider lines than 199 but much faster.

198 Carbide Shaver
DISCONTINUED

201 (699) Carbide Bur \$4.95

Also used for filigree cutting. Used on most eggshells.

203 Carbide Bur
DISCONTINUED

Used for very fine cutting.
Best used on small eggshells.

204 Diamond Flame Drill \$12.95

Can be used to cut most eggshells, lasts longer than carbides.
Use for fine work.

205 Diamond Flame Drill \$12.95

Can be used on most eggshells.
Larger circumference than 204.

212 Diamond Flame Drill \$24.95

Best used on larger eggshells (Rhea and Ostrich).
Cuts widest line of all burs and drills.

207 Diamond Wheel 3/16" \$22.95

Use to cut eggs in half or cut ovals, thin blade (.5 mm thick).
Solid surface.

208 Diamond Wheel 3/16" \$12.00

Same size as 207 but longer shaft.
Makes tighter curves than larger wheels.

214 Diamond Wheel 1/4" \$16.95

OUT OF STOCK

Largest wheel for air tool.

215D Sm. Flying Saucer Wheel \$12.95 -

Makes a tiny petal shape.

216 Med. Flying Saucer Wheel \$13.95

Makes a small petal shape.

NEW
217 Lg. Flying Saucer Wheel \$14.95
Makes a large petal shape.

The following burs and drills can be used for etching, scratch carving, and more. These burs are designed for the air tool but can be used in the Dremel using a 482-D (1/16") collet.

SC217 Diamond Football \$9.30

Finer texture for finer smoothing work.
Good for removing Emu shell layer to white area.

SC218 Diamond Football \$9.30

Finer texture for finer smoothing work.

SC219 Diamond Football \$9.30

Regular texture for rough shaping.
Develops depth for petals and creating veins.

SC220 Diamond Football \$9.30

Larger version of SC219.
Covers larger areas.

More burs and drills to be used for etching and Scratch carving. Items designed for the air tool, but can be used in the Dremel with a 482-D collet.

SC222 Round Carbide
DISCONTINUED

Use for outlining patterns.
Creates fine rounded line - good for hair, etc.

SC223 Round Carbide \$3.95

Use for outlining.
Makes a larger line than SC222.

SC224 Round Carbide \$3.95

Heavy removal of top layer of Emu shell.
For removing large areas of Ostrich shell.

SC225 Inverted Cone Carbide \$3.95

Very fine, excellent for outlining for a sharp straight edge.
Most popular for outlining.

SC226 Inverted Cone Carbide \$3.95

Makes more pronounced lines.
Use on outer edges of patterns.

SC227 Cylinder Carbide \$3.95

Side cutting bur.
For removing, finishing and getting into small corners.

SC228 Plain Fissure Carbide \$3.95

Use for removing shell.
For corners and tight places.
Makes nice clean edges.

SC229 Cone End Diamond
DISCONTINUED

Smoothing, removing shell.
Makes concave lines.

SC230 Round End Taper Diamond \$9.30

Good for sculpting.
Use on goose eggs and up.
Removes shell faster than 199 or 699.

Experiment with these burs to find which works best for your purpose. These have a variety of uses and we have listed just a few. Many thanks to Bob Ihrig for his help in describing the uses for these burs.

275 Single Speed – Dremel Tool

DISCONTINUED

This high speed 35,000 RPM tool is double insulated and has a permanently lubricated bronze sleeve bearing motor for smooth dependable power.

Motor Specifications:

120V, 50-60 Hz, AC, 1.15

Amps.

1/8" collet included.

All other features and benefits are the same as Model 395.

395 Variable Speed – Dremel Tool

DISCONTINUED

The model 395 is our top of the line tool. It has an adjustable high speed ball bearing motor 5,000-35,000 RPM. Speed can be adjusted for any application, any material. It is double insulated, eliminating the need for grounding. The custom designed shatter resistant housing fits comfortably in your hand to provide precise finger-tip control. A thrust bearing provides greater drilling capability. Other features include easy replacement of motor brushes, conveniently positioned shaft lock switch prevents shaft rotation when changing bits and 6 ft. two-wire cord. 1/8" collet included.

Motor Specification: 120V, 50-60 Hz, AC, 1.15 Amps.

225-D Flex-Shaft Attachment

DISCONTINUED

Attaches to Dremel tools #'s 275 & 395. Versatile 36" long cable with comfortable 1/2" diameter slim-grip handpiece allows finger-tip control to carve, sand, polish, clean, engrave, cut and more.
